EXPERIENCE

Los Alamos National Laboratory (Los Alamos, NM)

1/2023 - To present

Full-Stack Web Developer

- Led development of a nuclear compliance document builder application, for processing purchases of items and services.
- Translated ambiguous physical forms to a streamlined app, saving purchasers and processors an average of 5 hours per order
- **Awarded High Performance Recognition** for outstanding contributions to project success and operational efficiency.
- Mentored junior developers, conducting code reviews, pair programming sessions, and providing guidance on best practices and coding standards in our MERN stack.
- Communicated effectively with cross-functional teams, including QA and UX designers, to ensure product quality and user experience.
- Implemented Jest unit tests across multiple applications, to ensure code quality, reliability, and comprehensive test coverage for CI/CD delivery.

Premiere Digital (Los Angeles, California)

4/2022 - 9/2022 (layoff)

Lead Front-End Web Developer

- Rebuilt Premiere Digital customer facing CMS using React to manage movie and TV content placement across multi-national regions off the backbone of a python backend
- Created file normalization for excel, csv, and pdf to ingest data and automatically restructure it to match each user's standards, saving customers an average of an hour of tedious work a day
- Developed a CI/CD pipeline to facilitate the implementation of React codebase reconstruction
- Setup unit tests and automation testing in codebase with Jest, and Playwright all running within docker containers

Lam Research (Tualatin, Oregon)

1/2020 - 4/2022

Front-End Web Developer

- Created manufacturing dashboard used daily by Pilot Manufacturing Group to track the location, status, parts, projected completion, etc. of semiconductor machinery using React
- Created a manufacturing projection system to forecast the completion of machines down to the hour
- **Awarded Several High Performance awards** for outstanding contributions to project success.
- Created labor hour dashboards based on multiple user types: technicians, leads, supervisors, and managers. To track the labor allocated to each machine.

PROFESSIONAL CERTIFICATE

ScrumAlliance: Certified ScrumMaster

2/2023

EDUCATION

Bachelor's of Science: Chemistry; Minor: Mathematics

Graduated 6/2018

Southern Oregon University (SOU)

INTERESTS

SOU Varsity Sport Cross Country and Track and Field

9/2013 - 5/2016

- Qualified National Marathon in 2014 Track season
